

Free Bio-Manufacturing Technician Pre-Apprenticeship Program this Spring!

Why make the move to the Biomanufacturing Industry?

- Growing industry with a high demand for skilled employees
- Growth opportunities and flexible shift options
- Start a new career with a bright future

The program will provide you with the foundation necessary to begin a career as an Entry Level Bio-Manufacturing Technician.

Timeline: Spring 2024

In-person sessions will be held Monday, Tuesday and Wednesday evenings for the first three weeks. The last eight weeks, in person classes will be held on Monday evenings and Saturday mornings; virtual classes will be held Tuesday evenings.

This **FREE** program is open to adults who hold at least a high school equivalency. Prior work experience and the ability to work in the United States is required to be a part of the program.

People who are seeking employment in bio-manufacturing are preferred.
